

Amend claim 1 as follows:

Sub C. 1. (Amended) A composition comprising as the sole pharmacologically active components:

- AB
- (a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;
 - (b) a source of salicylic acid a physiologically acceptable derivative thereof;
 - (c) vitamin C and, optionally, one or more of:
 - (d) a physiologically acceptable source of assimilable manganese;
 - (e) a physiologically acceptable source of assimilable iron;
 - (f) a physiologically acceptable source of assimilable sulphur; and
 - (g) a physiologically acceptable source of assimilable zinc.

Add the following new claims:

Sub C. 21. The composition according to Claim 1 comprising as the sole pharmacologically active components:

- AB
- (a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;
 - (b) salicylic acid or an alkali or alkaline earth metal salt thereof; and
 - (c) vitamin C.

22. The composition according to Claim 1, containing (e) a physiologically acceptable source of assimilable iron and (f) a physiologically acceptable source of assimilable sulphur.

23. The composition according to Claim 1, containing a physiologically acceptable source of assimilable zinc.

24. The composition according to Claim 1, wherein the said metals are present in the form of salts with organic or inorganic acids.

25. The composition according to Claim 24, wherein the salts are the same or different and are selected from the group consisting of orotates, aspartates, gluconates, tartrates, citrates, lactates and acetates.

Sub
C
cont.
26. The composition according to Claim 25, wherein the copper salt is selected from the group consisting of copper gluconate and copper orotate and the manganese salt, if present, is selected from the group consisting of manganese gluconate and manganese orotate.

27. The composition according to Claim 24, wherein the salts are the same or different and are selected from the group consisting of chlorides, bromides, iodides, phosphates and sulphates.

28. The composition according to Claim 1, wherein component (b) is sodium salicylate.

29. A composition comprising:

- (a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;
- (b) salicylic acid or an alkali or alkaline earth metal salt thereof;
- (c) vitamin C; and
- (d) a physiologically acceptable source of assimilable manganese.

30. The composition according to Claim 29, containing (e) a physiologically acceptable source of assimilable iron and (f) a physiologically acceptable source of assimilable sulphur.

31. The composition according to Claim 29, containing a physiologically acceptable source of assimilable zinc.

Sub
C'
cont.
32. The composition according to Claim 29, wherein the said metals are present in the form of salts with organic or inorganic acids.

AB
33. The composition according to claim 32, wherein the salts are the same or different and are selected from the group consisting of orotates, aspartates, gluconates, tartrates, citrates, lactates and acetates.

34. A composition according to Claim 33, wherein the copper salt is selected from the group consisting of copper gluconate and copper orotate and the manganese salt, if present, is selected from the group consisting of manganese gluconate and manganese orotate.

35. The composition according to claim 32, wherein the salts are the same or different and are selected from the group consisting of chlorides, bromides, iodides, phosphates and sulphates.

36. The composition according to Claim 29, wherein component (b) is sodium salicylate.

37. A composition comprising:

15 to 60 parts by weight copper gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable copper other than copper gluconate is used;

300 to 600 parts by weight sodium salicylate, or equivalent amount of active ingredient when salicylic acid or another alkali or alkaline earth metal salt thereof other than sodium salicylate is used; and

200 to 1000 parts by weight vitamin C,

the parts by weight referred to being based on the total weight of these ingredients in the composition.

38. The composition according to Claim 37 comprising:

15 to 40 parts by weight copper gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable copper other than copper gluconate is used;

300 to 400 parts by weight sodium salicylate, or equivalent amount of active ingredient when salicylic acid or another alkali or alkaline earth metal salt thereof other than sodium salicylate is used; and

300 to 500 parts by weight vitamin C.

39. The composition according to Claim 37, further comprising 15 to 60 parts by weight manganese gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable manganese other than manganese gluconate is used.

40. The composition according to Claim 37, further comprising 15 to 60 parts by weight iron gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable iron other than iron gluconate is used, and 15 to 60 parts by weight of sulphur.

Corr.
41. The composition according to Claim 37, further comprising 15 to 60 parts by weight zinc gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable zinc other than zinc gluconate is used.

42. The composition according to Claim 37, comprising:

A3
(a) 15 to 40 parts by weight copper gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable copper other than copper gluconate is used;

(b) 350 parts by weight sodium salicylate, or equivalent amount of active ingredient when salicylic acid or another alkali or alkaline earth metal salt thereof other than sodium salicylate is used; and

(c) 400 parts by weight vitamin C.

43. The composition according to Claim 42, further comprising 15 to 40 parts by weight manganese gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable manganese other than manganese gluconate is used.

44. The composition according to Claim 42, further comprising 15 to 40 parts by weight iron gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable iron other than iron gluconate is used, and 15 to 40 parts by weight of sulphur.

45. The composition according to Claim 42, further comprising 15 to 40 parts by weight zinc gluconate, or equivalent amount of active ingredient when a physiologically acceptable source of assimilable zinc other than zinc gluconate is used.

46. A composition comprising as the sole pharmacologically active components:

(a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;

(b) salicylic acid or an alkali or alkaline earth metal salt thereof;

(c) vitamin C and, optionally, one or more of:

(d) a physiologically acceptable source of assimilable manganese;

(e) a physiologically acceptable source of assimilable iron;

(f) a physiologically acceptable source of assimilable sulphur; and

(g) a physiologically acceptable source of assimilable zinc,

wherein the composition is in the form of an orally administrable unit dosage form.

47. A composition comprising:

(a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;

(b) salicylic acid or an alkali or alkaline earth metal salt thereof;

(c) vitamin C; and

(d) a physiologically acceptable source of assimilable manganese,

wherein the composition is in the form of an orally administrable unit dosage form.

48. A composition comprising as the sole pharmacologically active components:

(a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;

(b) salicylic acid or an alkali or alkaline earth metal salt thereof;

(c) vitamin C and, optionally, one or more of:

(d) a physiologically acceptable source of assimilable manganese;

(e) a physiologically acceptable source of assimilable iron;

(f) a physiologically acceptable source of assimilable sulphur; and

(g) a physiologically acceptable source of assimilable zinc,

for use in the treatment of the human or animal body by therapy.

49. A composition comprising:

(a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;

(b) salicylic acid or an alkali or alkaline earth metal salt thereof;

(c) vitamin C; and

(d) a physiologically acceptable source of assimilable manganese,

for use in the treatment of the human or animal body by therapy.

50. A method of treating or preventing neoplastic disease in a human or animal patient comprising administering to the patient an anti-neoplastic effective amount of a composition comprising:

(a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;

(b) salicylic acid or an alkali or alkaline earth metal salt thereof; and

(c) vitamin C.

51. A method of treating or preventing neoplastic disease in a human or animal patient according to Claim 50 further comprising (d) a physiologically acceptable source of assimilable manganese.

52. A pharmaceutical product containing a composition comprising as the sole pharmacologically active components:

- (a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;
 - (b) salicylic acid or an alkali or alkaline earth metal salt thereof;
 - (c) vitamin C and, optionally, one or more of:
 - (d) a physiologically acceptable source of assimilable manganese;
 - (e) a physiologically acceptable source of assimilable iron;
 - (f) a physiologically acceptable source of assimilable sulphur and
 - (g) a physiologically acceptable source of assimilable zinc; and
- an additional component selected from the group consisting of vitamin C in addition to that in the composition, one or more amino acids and nicotinic acid, as a combined preparation for simultaneous, separate or sequential use in the treatment of a neoplastic disease.

53. A pharmaceutical product containing a composition comprising:

- (a) a physiologically acceptable source of assimilable copper other than a copper salicylate complex;
- (b) salicylic acid or an alkali or alkaline earth metal salt thereof;
- (c) vitamin C; and
- (d) a physiologically acceptable source of assimilable manganese, and
